

Skills

- JavaScript
- CSS
- AdobeXD
- Linux
- Express.js
- MapBox
- MongoDB
- HTML
- React
- Git
- React Native
- Ruby
- SQL
- Node.js

Experience

Sentry Data Systems

Production Support Analyst

June 2019 - Nov 2021

- Developed tools that helped reduce time spent on daily tasks by up to 50%
- Performed daily system health checks
- Created documentation for internal tools
- Identified and resolved errors in data ingestion feeds
- Managed and escalated incidents in order to troubleshoot and resolve high priority issues

RTRT.me

Full Stack Developer

May 2018 - Nov 2018

- Built applications that interfaced with the RTRT.me API
- Developed RESTful APIs in Node.js
- Translated designs into functional and responsive UIs
- Converted old JQuery codebase to ES5 standard
- Optimize JavaScript functions by using the DRY principles

Freelance

Web Developer

Jan 2018 - May 2018

- Translated Adobe XD mockups into functioning and responsive applications
- Designed websites with Adobe XD
- Connected React applications to REST APIs
- Developed fullstack React.js Applications with Node.js
- Optimized existing websites to reduce load time

Projects

Node Arduino Controller (NAC)

<https://github.com/taihelsel/NodeArduinoController>

A web application that uses Node.js and React.js to interface with an Arduino board. The Arduino board is connected to an IR Blaster that sends signals to an AC unit.

SoundCloud

<https://github.com/taihelsel/soundcloud>

This project was built to track data changes on songs posted from SoundCloud. The project scrapes data from SoundCloud and then uses React.js to display the data in a graph.
